EXCLUSIVE GLOBAL SALES PARTNER

E.I.D. LTD
INDUSTRIAL DIAMONDS

ABOUT US

DIAMOND ELEMENTS, BASED IN SURAT,INDIA, ARE A SPECIALIZED COMPANY WHO FOCUS EXCLUSIVELY ON THE MANUFACTURING OF HIGH PRECISION, FINE QUALITY SINGLE CRYSTAL DIAMOND BLANKS FOR USE EXCLUSIVELY ACROSS A WIDE RANGE OF SUPER FINISHING INDUSTRIAL APPLICATIONS

DIAMOND ELEMENTS - FOR BEST IN CLASS SINGLE CRYSTAL CVD DIAMOND BLANKS

We are uniquely capable of producing superior quality, flawless mechanical grade CVD blanks under stringent testing conditions, enabling:

- Reduction of internal stress to further enhance the diamond performance
- Patented post-growth treatment process for every diamond grown, Targeting isolated regions within the crystal, reducing lattice stress
- Controlled fracture and breakdown behavior in critical ultra-precision applications
- Improved toughness, performance and tool life

Thanks to two decades of proprietary research, we are the only producer in the industry with such capabilities. Diamond Elements perfectly controls nano specifications across multiple properties including custom-built orientation, shape, size, tolerance, waviness and consistency.

E.I.D - INDUSTRIAL DIAMONDS

For more than 50 years E.I.D has been providing the widest array of top quality industrial diamond stones, natural and synthetic diamond powders to the industrial tooling world.

With its headquarters in London, England, and worldwide marketing partners, E.I.D has established a global reputation for quality consistency and superior service.

Today E.I.D have customers on every continent. Our sales team speaks more than 10 dialects but we all speak the same language - the right product at the right price when and where you require it.

Together, Diamond Elements and E.I.D are perfectly placed to service all of your CVD single crystal diamond needs

FEATURES & BENEFITS OF OUR SCD BLANKS

FEATURES:

- High Wear Resistance
- High Chip resistance
- Binder Free
- High Abrasive resistance with thermal stability
- Stress-free material
- Long length availability
- Available in all orientations
- Constant wear along the length

BENEFITS:

- Reduction of operating costs
- Extreme high surface finish
- Best surface roughness achievable
- Consistence of tool life
- High quality surface finish in single cut
- Available in large quantities
- Simplified fabrication of tools

2P - DIRECTION 1

SINGLE CRYSTAL DIAMOND

2.0  X  10.0

2.0  Y  10.0

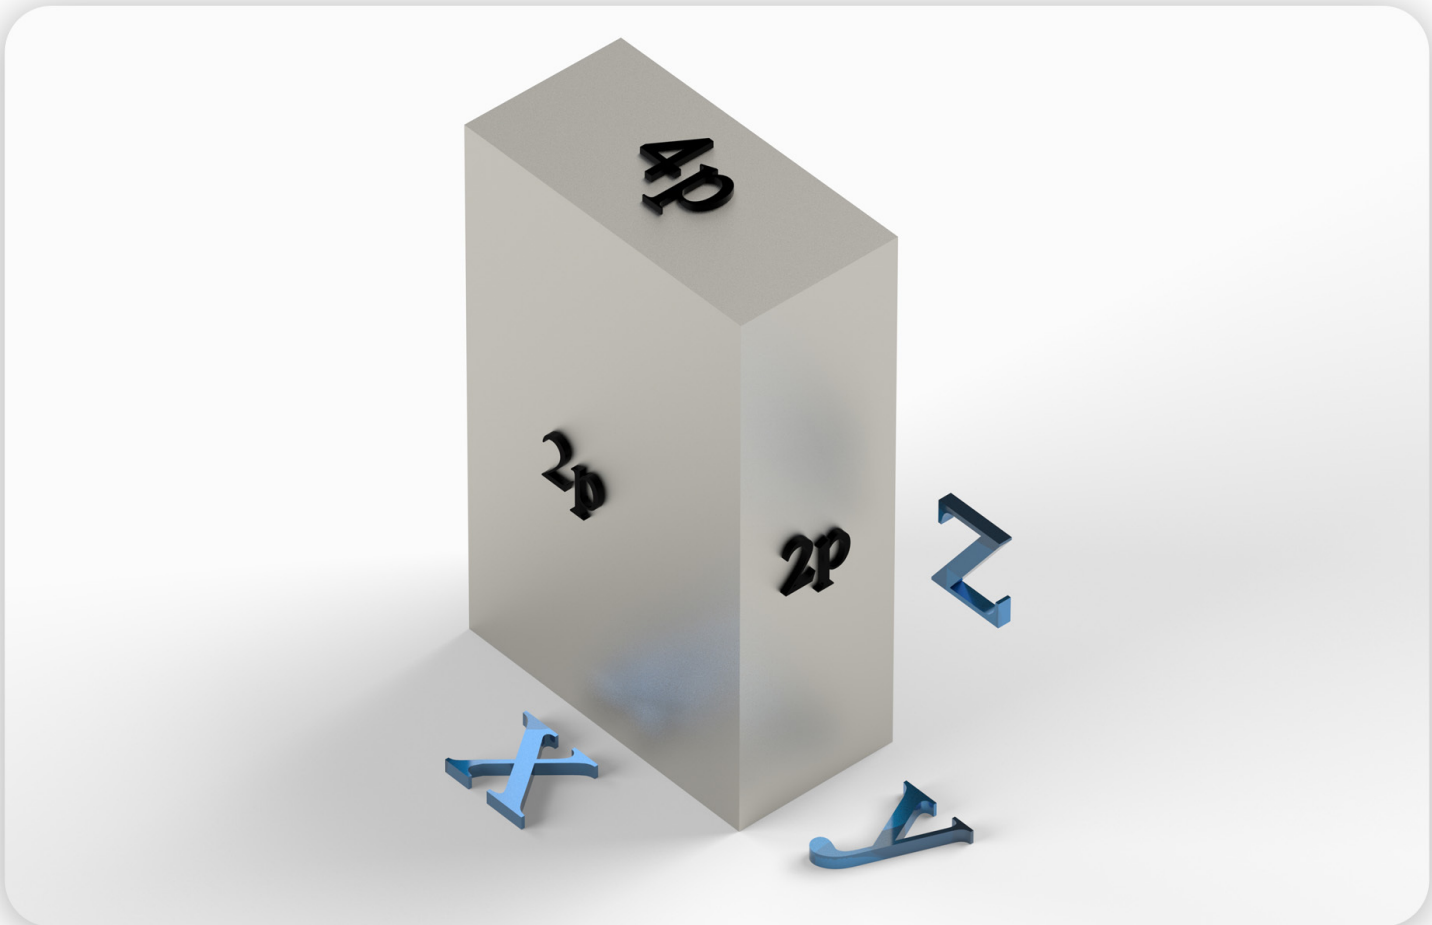

0.8  Z  5.0
